Challenges:

After the completion of project featuring the Strengthening of Drug Demand Reduction Service in Pakistan our program implementing teams have been facing some challenging since January, 2019. We overcome the challenges organizing different meetings with the head of different government departments and different institutions. We made it clear to different provincial ministers and government officers to make them understand about our objectives, mission, goals and different ongoing activities on drug demand reduction and drug use prevention. Project Coordinator Syed Zulfiqar along with his implementing team had to work hard to meet these challenges. At the moment DATH/YOCFAN and its implementing team has met these challenges successfully in the month of December. Now these officers and Ministers have been stream lined to understand our programs and mission.
